Corporate Sustainability in the 21st Century Jul 13 2021 Corporate sustainability needs a rethink. We have entered the human-influenced Anthropocene age, and we are witnessing accelerating changes in earth system processes. Businesses' current initiatives, such as product innovation and pollution reduction, are not enough to combat the intensifying social-ecological challenges that face us. *Corporate Sustainability in the 21st Century* is an innovative new textbook which provides a fresh conceptual framework for understanding and engaging with sustainability, now and in the future – "Business In Nature." This book critically discusses key concepts and topics related to corporate sustainability, with a focus on corporate sustainability strategies and corporate value chains. Setting itself apart from existing books, it introduces ideas from global ecology and the natural sciences to provide readers with a new language for discussing business and sustainability. This book maintains an international perspective throughout, with a wealth of examples, case studies and discussion questions. It will be a valuable text for students of corporate sustainability; business, nature and society; and environmental studies, and will also be useful for managers seeking a new perspective on how being "green" can fit with business goals.

Cross-cultural Perspectives on Well-Being and Sustainability in Organizations Mar 09 2021 This book explores a new area of psychology of sustainability and sustainable development with specific focus on organizations, and introduces a range of advanced perspectives for healthy business, harmonization and decent work. Split into two parts, the first half presents cross-cultural contributions that study in depth the benefits and drawbacks of sustainability, while the second half discusses theoretical approaches and empirical research that offer new prospects for innovation in prevention science. Gathering research from leading scholars and researchers from around the globe, this book offers an essential reference guide that will benefit researchers, professionals, students, and policy makers interested in promoting better business harmony and sustainability.

Environmental Sustainability in a Time of Change Dec 06 2020 *Environmental Sustainability in a Time of Change* is the first book in a new Palgrave series on Environmental Sustainability. It takes a fresh look at the dynamic field of environmental sustainability by exploring the interconnections between climate change, water, energy, waste, land use, ecosystems, food, and transportation. It also provides an extensive summary on sustainability management, data analysis, mapping, and data sources. Brinkmann highlights how environmental sustainability challenges are distinctly different in the developed world, where sustainability is largely a choice, versus the developing world, where many struggle with basic existence due to war, migration, and water or food scarcity. He takes a broad systems and historic approach to contextualize environmental sustainability prior to the 1987 Brundtland Report and utilizes many contemporary examples throughout the text, analyzing numerous case studies from many areas of the world including China, Yemen, Malaysia, Egypt, and Florida. This book questions traditional approaches to sustainability that highlight the need for an equal balance of economic development, environmental protection, and social equality to achieve sustainability. This book focuses on a new line of thinking that places environmental sustainability as the key foundation in how to manage sustainability in a time of change. Our planet is quickly becoming environmentally unsustainable due to global consumption and unsustainable economic development and it is high time for a fresh approach. This book will be of great value to academics, practitioners, and students interested in environmental sustainability from a myriad of fields including geology, geography, biology, ecology, economics, business, sociology, anthropology, and other areas that intersect the interdisciplinary field of sustainability.

Gender and Sustainability May 23 2022 *Gender and Sustainability* deals with women's struggles to contend with global forces—environmental change, economic development, discrimination and stereotyping about the roles of women, and diminishing access to natural resources—not in the abstract but in everyday life. It addresses the lived complexities of the relationship between gender and sustainability.

Complex Systems: Innovation and Sustainability in the Digital Age Dec 26 2019 This book provides a coherent framework for understanding the essence of complex systems and the nature of digital transformations, analyzes challenges of and patterns in innovative development, and shares a wealth of insights and best practices, resulting in the most extensive coverage of the topic available. In particular, the book's cutting-edge contributions, prepared by scientists, engineers, and field experts, focus on the design, implementation, and evaluation of practical interventions that promote the innovative and sustainable development of complex systems. In addition to sharing a rich collection of cases from around the world, they provide a broad interdisciplinary analysis of collaboration mechanisms, theories and approaches to support and accelerate the development of complex systems.

Education and Sustainability Jan 27 2020 Cover -- Title -- Copyright -- Contents -- List of figures -- List of tables -- Preface -- Author and editor biographies -- PART I Projects and paradigms in sustainability education -- 1 Introduction: Education for Sustainability in Asian contexts -- 2 Sustainable development: concepts, histories, and paradigms -- 3 Economics approaches to sustainability: methods and applications -- Part II National policy on sustainability education -- 4 Sustainability in Malaysian Research Universities' curricula and their effectiveness -- 5 Sustainability in Cambodia's higher education system -- 6 Sustainability aspects of the education system in India -- 7 Sustainability education in Korea -- Part III Policies, practices and programmes in Asian universities -- 8 Sustainability policy and practices in Thai higher education -- 9 Practices of education for sustainability in Renmin University of China -- Part IV Sustainability in Asian schools of education -- 10 Indonesian student participation in Green Action Projects -- 11 Climate change and sustainability education: Singapore teachers' perspectives -- 12 Education for sustainable development in the Faculty of Education, Chulalongkorn University, Thailand -- 13 Inquiring into Hong Kong undergraduate students' environmental attitudes and behaviours -- Part V Practices in and out of the higher education classroom -- 14 A case study of the sustainable landscape architectural design studio course at Thammasat University, Bangkok, Thailand -- 15 Water footprints: new paradigms in educating for environmental sustainability in the Philippines -- 16 Enhancing University of Macau students' community engagement through residential college programs in partnership with local non-governmental organizations -- 17 Conclusions: the state of higher education for sustainability in monsoon Asia -- Index

Tourism, Recreation, and Sustainability Sep 22 2019 This book presents analytical frameworks for examining the concept of sustainability in tourism and recreation within the context of sustainable development. It also includes numerous case studies in a variety of cultural, political and environmental contexts. Contributors include well known authorities from North America, Europe and Australia.

Conflict and Sustainability in a Changing Environment Aug 14 2021 Using a case study of the Trio indigenous peoples in Suriname, *Conflict and Sustainability in a Changing Environment* presents an inside view of a community facing climate change and on the path toward sustainable development. Smith and Bastidas take the reader beyond an examination of examples from the field of practice and into a thorough case study on climate change. With more than ten years of field experience, Smith and Bastidas present an in-depth, bottom-up analysis of sustainable development, including tools for practitioners, insight for academics and advice to policymakers.

Media Construction of Environment and Sustainability in India Mar 21 2022 The book analyses the role of media and communication in negotiating the meaning of environment and sustainability in the developmental context of India. As part of the global development discourse, it has become necessary to refocus on the meanings attributed to environment, sustainability, and sustainable development at the local and national level. The impact of these globally generated imperatives on a democratic, fast-developing nation like India is determined by the extent to which meaning negotiation through discourse aids their acceptance within society. *Media Construction of Environment and Sustainability in India* presents a theoretical framework against which the role of media and communication in enabling this meaning negotiation is explored and illustrated through textual analysis and examination of interview data. The uniquely theoretical and practical perspective on the discursive construction of these concepts will be of immense value for policy makers, development and media practitioners, scholars, and students of media and communication.

Green Development Oct 28 2022 This new edition has been completely re-written. Giving a valuable analysis of the theory and practice of sustainable development, it

suggests that at the start of the new millennium we should think radically about the challenge of sustainability.

Stories of Change and Sustainability in the Arctic Regions Jul 01 2020 This book presents stories of sustainability from communities in circumpolar regions as they grapple with environmental, economic and societal changes and challenges. Polar regions are changing rapidly. These changes will dramatically effect ecosystems, economy, people, communities and their interdependencies. Given this, the stories being told about lives and livelihood development are changing also. This book is the first of its kind to curate stories about opportunity and responsibility, tensions and contradictions, un/ethical action, resilience, adaptability and sustainability, all within the shifting geopolitics of the north. The book looks at change and sustainability through multidisciplinary and empirically based work, drawing on case studies from Norway, Sweden, Alaska, Canada, Finland and Northwest Russia, with a notable focus on indigenous peoples. Chapters touch on topics as wide ranging as reindeer herding, mental health, climate change, land-use conflicts and sustainable business. The volume asks whose voices are being heard, who benefits, how particular changes affect people's sense of community and longstanding and cherished values plus livelihood practices and what are the environmental, economic and social impacts of contemporary and future oriented changes with regard to issues of sustainability? This volume will be of great interest to students and scholars of sustainability studies, sustainable development, environmental sociology, indigenous studies and environmental anthropology.

Business Ethics Oct 04 2020 The fourth edition of this book introduces business ethics concepts, tools and theories, then applies them to key stakeholder groups. It takes a global approach in a market dominated by US texts. The accessible style and thorough pedagogy ensure the book is both student- and teacher-friendly.

The Challenge of Sustainability in Agricultural Systems Aug 22 2019 This book presents a multidisciplinary collection of original contributions made by the leading scholars and practitioners on researching, building, and maintaining sustainable agricultural systems. Being the first of its kind, the book is divided into two volumes. This book presents a comprehensive and informed review of the current state of multidisciplinary knowledge on sustainability in agriculture. The gaps in the scholarly literature are identified and rigorously analyzed, presenting a clear picture of the promising research directions. The authors critically analyze the very concept of sustainable agricultural systems, primarily focusing on the interactions existing between their integral components and with external environments. Relying on the provisions of complex systems science, the scholars then discuss the best approaches and methodologies used to build a comprehensive understanding of agricultural systems, with relation to achieving and maintaining their sustainability. More than that, this book holds two rich sections on (1) agricultural economics and (2) rural sustainability. Understanding sustainable development as a movement toward clearly defined and measurable goals, a set of chapters explore those policies, practices, technologies, and management systems that have an impact on the sustainability of agricultural systems. Agricultural sustainability is an urgent issue to be addressed, and this book makes a unique contribution. Due to its practical focus, the book appeals to practitioners and policymakers working in agricultural economics, governance, and sustainability, not just academics. This is also a valuable resource for graduate students interested in agricultural systems, sustainability, as well as complex systems theory and practice.

Toys and Sustainability Jan 19 2022 This book presents five interesting chapters dealing with the sustainability of toys. The concept of sustainability has reached all industrial sectors these days and being practiced in almost all the sectors. One of the main sectors where sustainability has to be embedded to the core is the toy sector. Needless to enumerate the importance of sustainability in this sector especially when it comes to usage of chemicals and so on. There are various elements associated with the sustainability of toys and there is a dearth of published literature on this subject.

Strategy and Sustainability Aug 02 2020 Business and environmental sustainability are not natural bedfellows. Business is about making money; sustainability is about protecting the planet. Business is measured in months and quarters; sustainability often requires significant short term costs to secure a sometimes uncertain long-term benefit. To some activists, all executives are exploitative, selfish “1 percenters”. To some executives, all activists are irresponsible, unyielding extremists. And yet engaging with the issue isn't optional – all businesses must have a strategy to deal with sustainability and, like any strategy, this involves making choices. Strategy and Sustainability encourages its readers to filter out the noise and make those choices in a hard-nosed and clear-eyed way. Rosenberg's nuanced and fact-based point of view recognizes the complexity of the issues at hand and the strategic choices businesses must make. He blends the work of some of the leading academic thinkers in the field with practical examples from a variety of business sectors and geographies and offers a framework with which Senior Management might engage with the topic, not (just) to save the planet but to fulfil their short, medium, and long-term responsibilities to shareholders and other stakeholders.

Ethics, Social Responsibility and Sustainability in Marketing Feb 08 2021 This book addresses the rising concept of 21st century societal marketing which entails that marketers should fulfill the needs of their target group in ways that enhance the well-being of a society as a whole. In the past, social responsibility and corporate ethics may not have been the key elements of corporate and business strategy. However, in the last decade the picture has changed dramatically. Consumers are more concerned about ethical issues and the effects of business activities on the environment and the society. The impact and importance of ethical consumerism is escalating. The consumers are more attentive and expect companies promote their ethical credentials in order to make them more accountable of their actions. This book also reveals how companies should realize that corporate social responsibility (CSR) is not an illustration of corporate altruism but a source of opportunity, and competitive advantage. Finding and following social initiatives as a part of the key business model is proved to be one of the competitive strengths in many instances. This book covers different issues related to ethics, social responsibility and sustainability in marketing and presents different cases and applications from different countries. Together with the best practices, each case and research is expected to shed light on how to improve the role of marketing in helping to the development and well-being of the society.

Poetry and Sustainability in Education Sep 15 2021 This edited collection offers educators at all levels a range of practical and theoretical approaches to teaching poetry in the context of environmental sustainability. The contributors are keenly aware of the urgency facing the planet's ecosystems—ecosystems which include all of us—and this volume makes the case that teaching poetry is not a luxury. Each of the book's three sections works from a specific angle and register. Part I focuses on pragmatic approaches to classroom activities and curricular choices; Part II considers policies and politics, including the role of the UN's Education for Sustainable Development (ESD) program; and Part III takes a widescreen view, exploring the philosophical issues that arise when poems are integrated into sustainability curricula. This book exemplifies how poetry empowers readers to think imaginatively about how to sustain—and why to sustain—our world, its resources, and its beauty.

Food and Sustainability in the Twenty-First Century Apr 10 2021 Sustainability is one of the great problems facing food production today. Using cross-disciplinary perspectives from international scholars working in social, cultural and biological anthropology, ecology and environmental biology, this volume brings many new perspectives to the problems we face. Its cross-disciplinary framework of chapters with local, regional and continental perspectives provides a global outlook on sustainability issues. These case studies will appeal to those working in public sector agencies, NGOs, consultancies and other bodies focused on food security, human nutrition and environmental sustainability.

Sustainability in the Textile and Apparel Industries Apr 29 2020 This book is part of a five-volume set that explores sustainability in textile industry practices globally. Case studies are provided that cover the theoretical and practical implications of sustainable textile issues, including environmental footprints of textile manufacturing, consumer behavior, eco-design in clothing and apparels, supply chain sustainability, the chemistry of textile manufacturing, waste management and textile economics. The set will be of interest to researchers, engineers, industrialists, R&D managers and students working in textile chemistry, economics, materials science, and sustainable consumption and production. This volume discusses novel trends and concepts in sustainable textile design, including innovative topics such as doodling and upcycling in clothing and apparel design for sustainable fashion initiatives. Along with strategies for repurposing fashion sustainability, the book also covers university interventions for the development of proper and environmentally friendly design practices. Specific technologies addressed include UV applications, laser treatments for dyeing, refined surface design techniques for products such as leather.

Water, Climate Change, and Sustainability Jun 12 2021 WATER, CLIMATE CHANGE, AND SUSTAINABILITY An in-depth review of sustainable concepts in water resources management under climate change Climate change continues to intensify existing pressures in water resources management, such as rapid population growth, land use changes, pollution, damming of rivers, and many others. Securing a reliable water supply—critical for achieving Sustainable Development Goals (SDGs)—requires understanding of the relation between finite water resources, climate variability/change, and various elements of sustainability. Water, Climate Change, and Sustainability is a timely and in-depth examination of the concept of sustainability as it relates to water resources management in the context of climate change risks. Featuring contributions by global authors, this edited volume is organized into three sections: Sustainability Concepts; Sustainability Approaches, Tools, and Techniques; and Sustainability in Practice. Detailed chapters describe the linkage between water and sustainable development, highlight the development and use of new measuring and reporting methods, and discuss the implementation of sustainability concepts in various water use sectors. Topics include localizing and mainstreaming global water sustainability initiatives, resilient water infrastructure for poverty reduction, urban water security for sustainable cities, climate actions and challenges for sustainable ecosystem services, and more. This important resource: Reviews contemporary scientific research and practical applications in the areas of water, climate change and sustainability in different regions of the world Discusses future directions of research and practices in relation to expected patterns of climate changes Covers a wide range of concepts, theories, and perspectives of sustainable development of water resources Features case studies of field and modelling techniques for analyzing water resources and evaluating vulnerability, security, and associated risks Discusses practical applications of water resources in contexts such as food security, global health, clean energy, and climate action Water, Climate Change, and Sustainability is an invaluable resource for policy makers water managers, researchers, and other professionals in the field, and an ideal text for graduate students in hydrogeology, climate change, geophysics, geochemistry, geography, water resources, and environmental science.

Environmental Sociology May 11 2021 Environmental Sociology: Risk and Sustainability in Modernity examines the encounter between sociology and contemporary environmental issues. It presents the proposal for an environmental sociology considering the dilemmas surrounding sustainable development, ecological modernization, and risk society. In this book, Cristiano Luis Lenzi critically examines these concepts, aiming to show how controversial environmental sociology still is. The book offers a nuanced interpretation of some of the issues and disputes that arise in the debate over these approaches in the sociological literature.

Business Infrastructure for Sustainability in Developing Economies May 31 2020 Economic growth is one of the primary goals for all countries. There are many factors that contribute to a healthy and stable economy, and studying these emerging methods and techniques can aid in creating sustainable economic growth. Business Infrastructure for Sustainability in Developing Economies is a comprehensive reference source filled with informative discussions on the socio-economic expansion of developing nations. Featuring dynamic topics such as supply chain management, foreign trade deficits, service quality, and sustainable energy solutions, this book is an ideal resource for business managers, practitioners, professionals, and researchers who are interested in discovering the most recent trends and solutions in sustainable economic growth.

Leadership and Sustainability in the Built Environment Jan 07 2021 Leadership and sustainability have separately been the subject of numerous studies in a built environment context over the years, but they have yet to be addressed together. The real impact of legislation and guidelines designed to promote sustainability within the construction industry is closely linked to the leadership behind it, as this book explores in a variety of ways. Featuring research from 5 different continents, the international scope of this book allows a comparison of experiences in different types of economies and cultures. The interdisciplinarity of this subject is also reflected in the backgrounds of the contributors, with a significant number of perspectives derived from business and management research. The issues examined in this book are essential reading for all researchers, decision-makers and graduate students in the built environment.

Heritage and Sustainability in the Islamic Built Environment Aug 26 2022 The essays in this book represent an up to date research and investigation into the various aspects of heritage and sustainability in the Islamic Built environments with an analysis of the problems that these cities face, as they confront the forces of globalization and new development. The authors in the book aim to the need for knowledge and understanding of Islamic society which is crucial for comprehending their rich architectural heritage and urban form with their intended meanings and uses. The book embraces a wide array of principles, strategies and precedents that are instrumental to the design of cities and communities in Islamic regions in order to sustain their cultural and environmental vitality. The subject matter in this book will provide an important body of knowledge, not only to the design professionals and students of architecture and planning, but also includes useful information across disciplines, such as social sciences, planning, urban geography and more.

Sustainability and the U.S. EPA Sep 27 2022 Sustainability is based on a simple and long-recognized factual premise: Everything that humans require for their survival and well-being depends, directly or indirectly, on the natural environment. The environment provides the air we breathe, the water we drink, and the food we eat. Recognizing the importance of sustainability to its work, the U.S. Environmental Protection Agency (EPA) has been working to create programs and applications in a variety of areas to better incorporate sustainability into decision-making at the agency. To further strengthen the scientific basis for sustainability as it applies to human health and environmental protection, the EPA asked the National Research Council (NRC) to provide a framework for incorporating sustainability into the EPA's principles and decision-making. This framework, Sustainability and the U.S. EPA, provides recommendations for a sustainability approach that both incorporates and goes beyond an approach based on assessing and managing the risks posed by pollutants that has largely shaped environmental policy since the 1980s. Although risk-based methods have led to many successes and remain important tools, the report concludes that they are not adequate to address many of the complex problems that put current and future generations at risk, such as depletion of natural resources, climate change, and loss of biodiversity. Moreover, sophisticated tools are increasingly available to address cross-cutting, complex, and challenging issues that go beyond risk management. The report recommends that EPA formally adopt as its sustainability paradigm the widely used "three pillars" approach, which means considering the environmental, social, and economic impacts of an action or decision. Health should be expressly included in the "social" pillar. EPA should also articulate its vision for sustainability and develop a set of sustainability principles that would underlie all agency policies and programs.

Earth Systems Protection and Sustainability Mar 29 2020 Earth Systems Protection and Sustainability qualifies imperatives and discusses the use of mathematical approaches to assess and achieve sustainability in threatened and vulnerable Earth systems globally. Mathematical advances in this context include both operational and Boolean methods, as well as linguistic, logic-based Bayesian approaches and generative mathematics relevant to scenario formation. The mathematic methods are refined into functional areas and deeper learning, which enable the use of searching algorithms to achieve optimal solutions for the circular nature and application of sustainability. Pertinent sections and synergistic elements are covered in order to synthesize key informative nodes, advising of the very real dangers facing planet Earth and its biodiversity. Each volume stands in its own right. Analytical and scientific chapters are blended with social resilience and socio-economic development consideration, thus enabling the settings of sustainability within varying scenarios of climatic forces and species dynamics. Volume 1 focuses on ground-breaking evolutionary expansion assisting with life's continuation on Earth, sustainable management of pathogens and halophyte uses in agroecology, bioremediation methods in drilling waste management, conservation and sustainability of diversity, climate change mitigation strategies, displacement management in a large scale ongoing crisis, risk reduction and management policy, sustainably intelligent-driven markets, sustainability consensus in an uncertain environment and path planning in static and dynamic environments. Pictorial contributions made from across the world refine particularly urgent problems for attention, and provide solutions and methods of environmental sustainability operated in communities, complementing the descriptive chapter sections. Both volumes are targeted for a global audience of academic, professional, classroom, governmental, unit and community members, and seek to include all sectors to ensure ongoing and comprehensive Earth Systems Protection.

Cooperation, Environment, and Sustainability in Border Regions Nov 05 2020

Stories of Change and Sustainability in the Arctic Regions Feb 26 2020 "This book presents stories of sustainability from communities in circumpolar regions as they grapple with environmental, economic, and societal changes and challenges. Polar regions are changing rapidly. These changes will dramatically effect ecosystems, economy, people, communities, and their interdependencies. Given this, the stories being told about lives and livelihood development are changing also. This book is the first of its kind to curate stories about opportunity and responsibility, tensions and contradictions, un/ethical action, resilience, adaptability, and sustainability, all within the shifting geopolitics of the north. The book looks at change and sustainability through multidisciplinary and empirically based work, drawing on case studies from Norway, Sweden, Alaska, Canada, Finland, and Northwest Russia, with a notable focus on indigenous peoples. Chapters touch on topics as wide ranging as reindeer herding, mental health, climate change, land-use conflicts, and sustainable business. The volume asks whose voices are being heard, who benefits, how particular changes affect people's sense of community and longstanding and cherished values plus livelihood practices, and what are the environmental, economic and social impacts of contemporary and future oriented changes with regard to issues of sustainability? This volume will be of great interest to students and scholars of sustainability studies, sustainable development, environmental sociology, indigenous studies and environmental anthropology"--

Environment and Sustainability in a Globalizing World Dec 30 2022 From the Foundations in Global Studies series, this student-friendly text follows a two-pronged approach to help readers understand the globalizing processes relating to environment and sustainability, which are examined in a range of disciplines, including environmental studies, geography, global studies, political science, international affairs, comparative politics, and other disciplines. First, it presents foundational material that gives students the conceptual underpinnings required for rigorous analysis. Following the Introduction and Overview, Part One presents a brief historical overview of the concerns revolving around environmental sustainability in the modern era. The text then covers key concepts and theoretical constructs that define the global context for sustainable environmental practices, such as the key thinkers and theories pertaining to sustainable environmental practice, and the key international agencies and treaties involved in global discussions. The first part then explores the various models and ways to measure sustainability, the range of environmental domains at play in the sustainability dialogue, and the controversies surrounding them. Part Two employs case studies to examine theory and practice at work in particular situations. The case studies have been selected with an eye toward comprehensiveness of coverage across disciplines and across regions. ns. The first part then explores the various models and ways to measure sustainability, the range of environmental domains at play in the sustainability dialogue, and the controversies surrounding them. Part Two employs case studies to examine theory and practice at work in particular situations. The case studies have been selected with an eye toward comprehensiveness of coverage across disciplines and across regions.

Measuring Tomorrow Nov 17 2021 How moving beyond GDP will improve well-being and sustainability Never before in human history have we produced so much data, and this empirical revolution has shaped economic research and policy profoundly. But are we measuring, and thus managing, the right things—those that will help us solve the real social, economic, political, and environmental challenges of the twenty-first century? In Measuring Tomorrow, Éloi Laurent argues that we need to move away from narrowly useful metrics such as gross domestic product and instead use broader ones that aim at well-being, resilience, and sustainability. By doing so, countries will be able to shift their focus away from infinite and unrealistic growth and toward social justice and quality of life for their citizens. The time has come for these broader metrics to become more than just descriptive, Laurent argues; applied carefully by private and public decision makers, they can foster genuine progress. He begins by taking stock of the booming field of well-being and sustainability indicators, and explains the insights that the best of these can offer. He then shows how these indicators can be used to develop new policies, from the local to the global. An essential resource for scholars, students, and policymakers, Measuring Tomorrow covers all aspects of well-being—including health, education, and the environment—and incorporates a broad range of data and fascinating case studies from around the world: not just the United States and Europe but also China, Africa, the Middle East, and India.

Citizenship and Sustainability in Organizations Apr 22 2022 Citizenship and Sustainability in Organizations: Exploring and Spanning the Boundaries is the introductory book in the series of the same name and draws upon new conceptual thinking from some of the leading contributors to The Journal of Corporate Citizenship on topics of social responsibility, organizational citizenship, influencing and leading change for sustainability and individual agency. Chapter authors are influential thinkers, pushing the boundaries of conventional thinking about corporate citizenship and sustainability to generate innovative ideas, models and practices. The book's core message is that the contexts within which organizations and individuals act are undergoing significant change and disruption. Existing corporate social responsibility (CSR), corporate

citizenship and business sustainability models and frameworks need to be adapted, abandoned or transformed. This book represents a starting point for dialogue about these challenges and presents commentaries, debates, essays and insights that aim to be provocative and engaging, raise some of the important issues of the day and provide observations on what may be too new yet to be the subject of detailed empirical and theoretical studies. The book is aimed at researchers, students and practitioners in the fields of corporate citizenship, sustainability, CSR, business ethics, corporate governance and critical management and leadership studies.

Business and Sustainability Feb 20 2022 Climate change, the resource constrained economy, and sustainability in general are amongst the hottest and most problematic topics for contemporary businesses. This book provides a comprehensive overview of how the world's sustainability challenges are affecting and being affected by business.

Sustainability in Energy and Buildings Jun 24 2022 This volume contains the proceedings of the Fourth International Conference on Sustainability in Energy and Buildings, SEB12, held in Stockholm, Sweden, and is organized by KTH Royal Institute of Technology, Stockholm, Sweden in partnership with KES International. The International Conference on Sustainability in Energy and Buildings focuses on a broad range of topics relating to sustainability in buildings but also encompassing energy sustainability more widely. Following the success of earlier events in the series, the 2012 conference includes the themes Sustainability, Energy, and Buildings and Information and Communication Technology, ICT. The SEB'12 proceedings include invited participation and paper submissions across a broad range of renewable energy and sustainability-related topics relevant to the main theme of Sustainability in Energy and Buildings. Applicable areas include technology for renewable energy and sustainability in the built environment, optimization and modeling techniques, information and communication technology usage, behavior and practice, including applications.

Environmental Conservation and Sustainable Development Oct 24 2019 It has become clearly to a larger part of the population in the World that environmental conservation in a wider sense is necessary, but few of developing countries have successful in alleviating their environmental problems. The objective of this book is to stimulate discussion about the conservation of the environment and sustainability in the developing countries. The book begins with the definition of the environment, environmental conservation, and sustainable development. The heavy emphasis of the book has been placed on the state of the environment and its problems in the developing countries. The analysis of the book focusing on poverty as a major source of environmental degradation, Sudan has been taken as an example. In addition the book discusses the environmental conservation from Islamic perspective. The book examines the administrative arrangement concerns with the questions of public participation and the role of local institutions in the environmental protection. Finally the book gives some suggestions for improvement and explain how environment can be promoted and sustainable development maintained effectively both at national as well as international level

Handbook of Research on International Collaboration, Economic Development, and Sustainability in the Arctic Sep 03 2020 Global interest in the exploration of the Arctic has been growing rapidly. As the Arctic becomes a global resource base and trade corridor between the continents, it is crucial to identify the dangers that such a boom of extractive industries and transport routes may bring on the people and the environment. The Handbook of Research on International Collaboration, Economic Development, and Sustainability in the Arctic discusses the perspectives and major challenges of the investment collaboration and development and commercial use of trade routes in the Arctic. Featuring research on topics such as agricultural production, environmental resources, and investment collaboration, this book is ideally designed for policymakers, business leaders, and environmental researchers seeking coverage on new practices and solutions in the sphere of achieving sustainability in economic exploration of the Arctic region.

CSR and Sustainability in the Public Sector Dec 18 2021 This book focuses on CSR in the public sector, in all its manifestations around the world, in order to consider its application in practice and its connections to sustainable objectives. This book is unique in that all chapters were written by members of the Social Responsibility Research Network. Their ideas have been tested and refined through the feedback given after they were presented at the 16th International Conference. The approach used in this book is based on the tradition of the Social Responsibility Research Network – a worldwide body of scholars that, over its 20-year history, has sought to broaden the discourse and to treat all research as inter-related and business-relevant. The book examines diverse aspects of how CSR and sustainability apply to, and are applied by, a variety of public bodies in a variety of ways. Thus, the authors focus on the priorities of these organisations, in order to consider the extent to which the focus has changed so much that we need to think about new approaches to our understanding of CSR and sustainability and differing effects in practice. The international mix of authors makes this an original contribution, sharing some of the best ideas from around the world

Development Banks and Sustainability in the Andean Amazon Jul 25 2022 This book explores what development banks, governments, and communities have learned in the last decade of careful negotiation between social and environmental protections in the Andean Amazon, and the pressures of a surging infrastructure and development boom. While mega-dams, highways, and ports are filling up the pipelines of planners, the national governments of Andean and Amazon-basin countries and major development banks have enacted ambitious social and environmental protections. The book traces the development of social and environmental protections after years of struggle by affected communities, going beyond official policies to discover how these reforms work in practice, and ultimately whether they are enough to stem the risks of infrastructure mega-projects. As Chinese public banks play an increasingly important role in the region, the book also demonstrates that there is a risk of governments undercutting their own standards. By contrast, this book shows that making infrastructure work for everyone involved requires mutually reinforcing networks of support and accountability among communities, governments, and development banks. This book, led by an expert multi-disciplinary, international team, will be of considerable interest to researchers in the fields of development and development economics, geography, anthropology, and ecology, as well as practitioners in development banks and in government regulatory and foreign aid agencies.

Green Development Nov 29 2022 "In print continuously since 1990, Green Development has won a place as a leading account of sustainable development used by generations of undergraduate and graduate students. This authoritative and readable text provides a clear and coherent analysis of sustainable development in theory and practice. The fourth edition of Green Development is fully revised, and up to date. It offers clear insights into the challenges of environmental sustainability, and social and economic development. The book has proved its value to generations of students as an authoritative, thought-provoking and readable guide to the field of sustainable development"--

Analyzing Sustainability in Peripheral, Ultra-Peripheral, and Low-Density Regions Nov 24 2019 In the last few years, advances in studies and research associated with the borderlands and the subsequent cross-border cooperation (CBC) have been increased and introduced all over the globe. Such advances essentially affect the cross-border strategies and policies, processes of border cooperation, and several complex border movements. Moreover, similar scenarios are encountered in ultra-peripheral and remote territories and low-density regions. There are common denominators, such as the limited land, water resources, and overexploitation of tourism, among many other factors, that make these specific territories critical case studies concerning their governance and sustainable development and growth. Analyzing Sustainability in Peripheral, Ultra-Peripheral, and Low-Density Regions investigates activities, processes, and behaviors in light of the new challenges and the desired sustainable development and growth model. It analyzes the dynamics and patterns ongoing in the peripheral, ultra-peripheral, and low-density regions regarding sustainability and the issues that may influence it. Covering topics such as glamping tourism, vegetation quality, and territorial cohesion, this premier reference source is an essential resource for government officials, business executives and managers, community leaders, environmentalists, researchers, and academicians.

Business and Sustainability in the European Union Oct 16 2021 Sustainability requires radical change. It needs to involve all levels of government, all social forces, and every single business and citizen. This report considers the vital question: How can business become an active and constructive participant in the achievement of sustainability? The CEPS Task Force considers business as a key participant in any radical process of change, either pro-actively or as the object of regulation of its own activities and those of its customers. Our ability to harness this force will be a make-or-break condition for a true sustainability.
